

BiggieFrog™ Adapted Activity Guide

Written By Dan Cariaga

Introduction

BiggieFrog is a good-sized object to catch, large enough to use as a target for throwing and safe to use as an obstacle to leap or jump over. This guide is designed to help you and your students get the most from your **BiggieFrog** in an adapted environment.

Objectives For Use Of BiggieFrog

To catch, throw and toss; jump, leap, hop or maneuver one's self over or around another object successfully.

Activities

Shoot This

Two students stand about 10" away from each other while tossing and catching the **BiggieFrog**. Other students use a soft, cushy ball (see the Sportime catalog) and try to hit the **BiggieFrog**.

Ribbid Ribbid Ribbid

Have several students count to 3 by saying "Ribbid, Ribbid, Ribbid." On the third "Ribbid" the students use a ParaStrip™ to launch a **BiggieFrog** in the air. Other students use a soft, cushy ball and try to hit the **BiggieFrog**.

Leap Frog

Scatter several **BiggieFrogs** and hula hoops on the ground. Instruct students to jump (with a 2-foot take off and landing) over the **BiggieFrogs** and leap (with a 1-foot take off and 1-foot landing) over the hula-hoops.

Medicine Ball

Have students use the **BiggieFrog** the same way they might use a medicine ball to practice catching.
